

EVALUATION OF EDUCATIONAL RESOURCES

The Superintendent evaluates the effectiveness of the educational resources used by the District to achieve the District's educational goals and objectives.

The individual resource areas are assessed yearly while the overall program is assessed every five years according to professionally recognized criteria and procedures.

Following are the educational resources listed in the State Board of Education Minimum Standards.

1. Certificated and classified staff are recruited, employed, assigned, evaluated and provided in-service education without unlawful discrimination.
2. Instructional materials and equipment support attainment of objectives specified in courses of study.
3. Facilities accommodate the enrollment and the philosophy of education and educational goals of the school.
4. Student health and safety is safeguarded by an organized program of school health services designed to identify student health problems and to coordinate school and community health resources for students.
5. Student cumulative records are maintained.
6. Student admission, placement and withdrawal is processed according to established procedures.
7. Student attendance and conduct is administered according to established objectives and procedures.
8. School guidance services are provided for students in kindergarten through grade 12 in accordance with a written plan adopted by the Board.
9. Student activity programs are operated in accordance with the Board's philosophy of education and educational goals and safeguard the interest of the school, participants and spectators. Schools will not sponsor interscholastic athletics for students in kindergarten through sixth grade.
10. A planned, community relations program is implemented to encourage citizen participation in, and support for, the educational program.
