

CAREER-TECHNICAL EDUCATION

The Board believes that the schools should provide education that is pertinent to the practical aspects of life and prepares students to make the transition from the school setting to the world of work. Therefore, the Board supports the inclusion of career-technical education in the basic curriculum.

Career-technical education is a program that enables each student to gain career awareness and to explore career opportunities in all fields so that he/she can make informed decisions about his/her future occupations.

Career-technical education is a concept that can be taught in the classroom at all grade levels. At the secondary level, it specifically incorporates career exploration, career guidance and career-technical education opportunities. The latter are designed to equip students to enter postsecondary occupational education programs, and/or specific occupations directly from high school.

Career-technical education is available as an integral part of the curriculum at the secondary level. It is geared to technological and economic conditions and changes, and, as a core component of comprehensive education, shares with other aspects of the high school curriculum the purpose of development of character, attitudes and skills. Guidance and counseling services are provided to each student throughout his/her program.

In an effort to meet the changing needs of the global, high-tech workforce, the Ohio Administrative Code provides a list of educational programs that may be offered to secondary high school students, adults, postgraduates and others desiring to obtain necessary workforce skills.

The educational program is administered by the Career-Technical Programs Director.

Fees are charged to students, as established by the Board, to pay for materials they use in these courses and programs.
