Sixth-graders at Hilliard Station eager to learn about energy

(Hilliard City Schools, Hilliard, Ohio) – They're sixth-graders who will become teachers in their school.

More than two dozen students from Hilliard Station Sixth Grade School will become "Energy Leaders" after attending an Ohio Energy Project fair Dec. 15 at Otterbein College. The students, escorted by science teachers Jeremy Fink and Becky Scheible, will be able to teach their peers about energy concepts upon their return.

Energy fairs sponsored by the Ohio Energy Project are full-day programs that incorporate hands-on activities to teach the students about energy sources, forms, transformations, efficiency and electricity through the use of energy toys and games.

For more information about the Ohio Energy Project, whose mission is to promote an energy-educated society, see www.ohioenergy.org. For more information about Hilliard Station's involvement in the project, contact Principal Thomas Tucker, 777-2426.

###

***Hilliard Station Sixth Grade School, 3859 Main St., is home to about 600 students.
Thomas Tucker, Ph.D. is the principal.***
