

Quizlet Tutorial

By: Sage Brumfield

What is Quizlet?

Quizlet is an app that allows you to make flashcards and other types of study guides to help you get ready for any test.

First Steps (Creating a Study Guide)

In order to get started making study guides you want to click on the “Create a new study set” tab.

LATEST ACTIVITY

Create a new study set

Second Step

Once you've selected the tab you can add your title with any terms and definitions you want.

 CREATE SET Done

TERM

DEFINITION

TERM

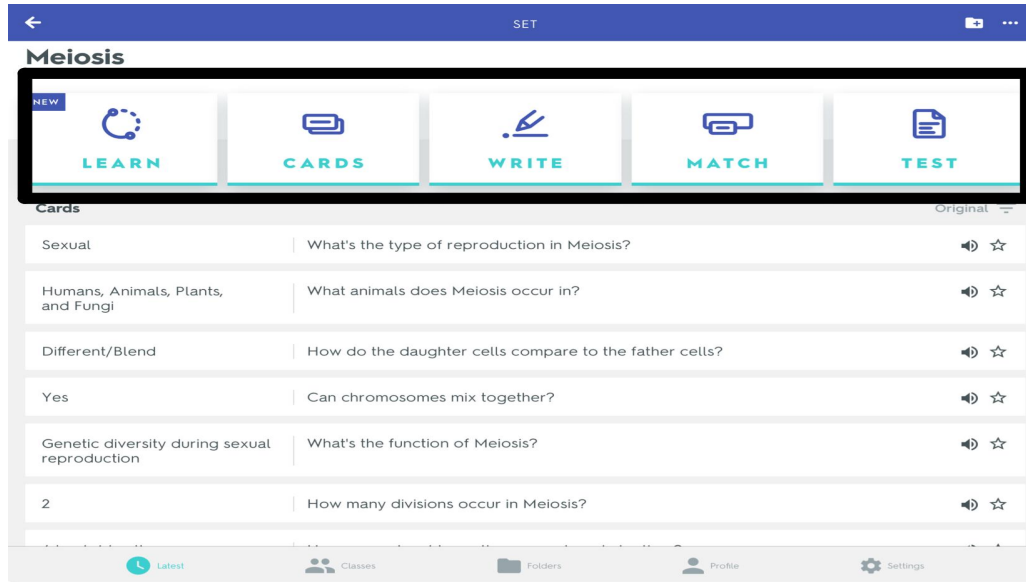

DEFINITION

(At the bottom of the page there is a plus sign which allows you to add more terms and definitions).

What do you do?

After you create all your study questions you will see a page with all them, and there will be different ways for you to study.

Different Ways to Study

Each of the study methods have something unique about them. The features you will find in the Test mode will be different from what you will see in the Match mode.

What animals does Meiosis occur in?

Haploid Cells
Sex Cells
Humans, Animals, Plants, and Fungi
Genetic diversity during sexual reproduction

(Test Mode)

7.3 SECONDS

How many steps occur in Meiosis?	Haploid Cells	Can chromosomes mix together?	How does a new set of chromosomes in a daughter cell compare to the parent?
What type of cells are produced during Meiosis	Daughter has less than half of the parent	Sexual	Yes
Meiosis 1-Prophase, Metaphase, Anaphase, Telophase Meiosis 2-Prophase, Metaphase, Anaphase, Telophase	What's the type of reproduction in Meiosis?	Who discovered Meiosis	Oscar Hertwig

(Match Mode)

Quizlet Live

Quizlet has a mode that is much like Kahoot. But you answer questions as a team, racing to be the first team to get all the answers correct.

How to Create a Quizlet Live

First you'll need to access your Quizlet on a computer (Quizlet Live can only be accessed on the computer) and there should be a new tab that says "Live". Once you have clicked Live there will be a code on it. That code will be what people will put into their device if they want to play.

How Quizlet Live Works

Quizlet Live works by dividing everyone who joined into random teams. Once they figure out their teams they need to work together to answer questions that could be found on the quizlet. The team that correctly answers all the questions will win the round, but the team who answers a question wrong will have to restart from the first question.

Whoever is running the game gets to see how every team is doing.

Sharing your Quizlet

Your Quizlet is able to be shared through the three dots in the upper right hand corner, then hit share. From there you can send your Quizlet to any other apps you want such as Notability.
