

S.T.E.M. LEGO Robotics BattleBot Camps

Ages 4-14 — No experience required!

At Robot Academy summer camps, kids 4-14 learn about S.T.E.M. in a fun and supportive environment. Kids build and program Lego robots to compete in a BattleBot championship! Campers make friends and improve grades at school with skills learned at STEM Camps.

No experience necessary - we teach kids everything they need to know to put together a winning BattleBot. Kids sit at tables with their age group.

SPECIAL DISCOUNTS FOR PEACHJAR:

Save 10% with 'School10' discount code for all camps.
