

S.T.E.M. LEGO Robotics BattleBot Camps

Ages 4-14 — No experience required!

New BattleBot Camps in Worthington and Dublin

The perfect Holiday Gift for your child or grandchild... LEGO Robot BattleBot Camp. Instead of just watching Robot Wars on TV, your child can actually create robots to battle. This is for you if you're looking to help your child build confidence with science and technology. Ages 4-14 (separated by age) will learn to build, program and compete with working LEGO robots.

This two-day, action-packed camp takes place on December 26th and 27th in Worthington with The Robot Guy or on January 19th and 20th in Dublin.
