

LEGO ROBOT BATTLEBOT CAMP

Ages 4-16. No experience required!

Students will build and program robots to compete against each other in an epic “BattleBot” championship. The robots will battle “to the death”, and the builder of the “last robot standing” will win a championship ribbon. We run the rounds several times so lots of students have chances to win!

At Robot Academy Camps, kids age 4-16 (students sit with their age group) design, build, and program working Lego robots to solve real-world challenges and win trophies and ribbons. World-champion Lego Robotics instructors guide kids through engaging and fun activities, while teaching about science and technology.
