at	do	is	no	to	Name
an	go	it	see	up	
and	he	like	she	we	
am	in	me	so		

Math – Day 2

Day Two

Part 1- Gather a collection of 30 - 40 objects (can be coins, matchbox cars, blocks paperclips, etc). Print the attached 1-20 numeral cards (or use playing cards or write the numerals 1-20 on index cards or a piece of paper). Have your child select a card and count out a matching quantity from the large group of objects. Make as many smaller sets of objects as possible from the larger set. When you are no longer able to make a set to match the cards push the objects back together and play again.

Part 2 – Gather a collection of 20 objects (can be coins, matchbox cars, blocks paperclips, etc). Use the numeral cards 1-10 (from the previous activity) and place them face down. Have your child turn over a card and make 3 collections – one that is the *same* as the numeral card, one that is *more* than the numeral card and one that is *less* than numeral card.

Day 2 – Science

Learning Target: *Living things are different from nonliving things. Living things respond, grow, and need energy (food).*

Web link and Directions:

1. Play the interactive Curious George game with adult help.
<http://www.curiousgeorge.com/kids-games/magic-seeds>
2. Watch the Trees video.
<http://www.curiousgeorge.com/themes/kids-videos/trees-video>
3. Science Journal: Write about the living things you explored on a piece of paper. You can use words and/or pictures.
