

## HOMEWORK

Homework definition: Is an extension of classroom instruction that supports student learning in partnership with parents/guardians.

Teachers/certificated staff shall consider the following factors when providing homework:

1. performance level of the students;
2. purpose of the homework and its relationship to the objectives;
3. length of the homework and the amount of time that will be required to complete it;
4. homework demands being made in other subject areas;
5. availability of required materials;
6. instructions are clear and
7. when necessary, short period of supervised study or a period of questioning to ensure that the student understands the assignment.
