For students taking Advanced Placement (AP) tests please check the College Board website at: <https://apstudent.collegeboard.org/takingtheexam/ap-calendar>

Attention Junior Parents

Per Ohio state law, the Ohio Department of Education will be paying for one administration of a college readiness examination to all juniors. For this school year, Hilliard City Schools has chosen the SAT for our students. On April 13th, all juniors (according to their grade in Home Access) will be taking the SAT test at their home building. This date was pre-assigned by the state and SAT. Students will report to school as normal, and the district will mimic the administration procedures typically enforced at a National, Saturday administration of the SAT. Below is additional information that will be helpful on both test day and leading up to test day. Please contact your building counselor's office for additional questions or clarification. Students will NOT need to register individually; we will register students at the district level directly with SAT.

- All SAT test security measures will be in place for this state assessment. Students should be prepared **NOT** to bring their cell phones into the testing location, and *should* have proper identification with them. (Current school ID, driver's license, state ID, etc.)
- Students who are found to be in violation of the "No Cell Phone" rule may have their phone confiscated, and face additional discipline consequences, including possible suspension.
- Students will do the pre-administration portion of the test PRIOR to test day. A portion of the pre-administration will allow students to choose up to four colleges they would like their scores to be sent.
- Students should plan to bring an SAT approved calculator to the test administration. (Calculator information linked [here](#).)
- Students should be able to see their scores from the state administration in their SAT college board account approximately 4 weeks from the test date.
- Please check the College Board website for specific questions:
