

In the event your child is missing, EZ Child ID allows you to have vital information at your fingertips for law enforcement. This information may be provided through an app on your phone and then sent to law enforcement if it is ever needed.

Fingerprints must be uploaded during the event onto each phone. Once uploaded you can update photos and personal information as your child grows.

Visit "Hilliard Division of Police" Facebook Page to find future events or sign up for a scheduled date and time by visiting:

Provided through a generous grant from the Hilliard Community Foundation and Advanced Drainage Systems (ADS)

Hilliard Division of Police

**EZ CHILD ID
 DOWNLOAD
 APP NOW**

DO THIS FIRST...

1. If you don't have unlimited data, free WiFi is provided at the event. **NOTE: "EZ Child ID" is not an internet access.** Ask event personnel which network to access.

2. Go to the App Store on your phone.

3. Download the free app: EZ Child ID

4. Make sure you close out the app completely.

5. Go to your phone's WiFi settings. Log onto EZCHILDID Intranet. This will allow you to access the event computer - no personal information is uploaded to servers. (No password is needed)

6. Now open the EZ Child ID app. Once your child's fingerprints and photo are taken, tap the 3 lines on the top left corner in App 

7. Tap "download child from event" (NOTE: It may take your phone 2—3 minutes or more to connect. You may also need to close out and attempt to connect several times during this time period. Don't worry. This is normal.)

8. Enter your **child's 3 initials** and **two-digit date of birth**

EXAMPLE: John K. Doe, 04-19-2005

Enter—**jkd041905**

Your Child's First Name

Your Child's Middle Name:

Your Child's Last Name

Your Child's Date of Birth

You can enter and update information in the app after the event.

WARNING:
YOU MAY BE AT RISK!

COMPLETE : (7) THREATS

(3) MALWARE APPS
(2) VIRUS THREATS
(1) VS. 2.3 UPDATE
(1) SECURITY UPDATE

REMOVE NOW

KEEP YOUR PHONE SAFE AND SECURE!

As with any private information on your telephone or computer, it is important to protect it. Download virus protection for your app. Don't use public WIFI when accessing private or sensitive information. Don't click into links you don't know or trust. That includes links through Facebook or other social media apps.
