SUMMER PROGRAM REGISTRATION WILL OPEN IN APRIL 2026!

IT On Ramp+ 9th and 10th grade

ITOR+ is a four-week, full-day program designed to boost high school students' algebra and geometry skills and confidence. Through hands-on, engaging lessons, students explore mathematical concepts within the exciting contexts of app development, game design, software development, and web development. By connecting math to real-world applications, ITO+ strengthens mathematical abilities while fostering creativity and problem-solving skills, ultimately linking their learning to future tech career opportunities.

Student TECH CORPS 11th and 12th grade

Tech Support equips students with skills in hardware, software, networking, and customer support. Through hands-on activities like building computer systems and managing a student-run help desk, students gain real-world experience and explore exciting IT career paths. Students interact with industry professionals and can earn a Pre-Apprenticeship certificate, Industry-Recognized Credentials, and Work-Based Learning Hours, paving the way for success in the tech field.

Web Development offers hands-on experience in a simulated company, teaching web development, project management, and professional skills while preparing students for successful tech careers. Students interact with industry professionals and can earn a Pre-Apprenticeship certificate, Industry-Recognized Credentials, and Work-Based Learning Hours, paving the way for success in the tech field.

All programs provided free of cost to eligible students.
This program is not endorsed or sponsored by the school district.
